

AI FITTRACK API

Customer Journey Map

A typical API user journey

TEAM ID	SWTID-2026-7021
TEAM	Baranivel K (Leader); Ramesh M; Srikanth M; Nandhakumar S; Chandru S
DATE	30 September 2026

Prepare

Install dependencies, configure MongoDB and environment values, and start Express.

Register and authenticate

POST /api/auth/register creates a user and returns a JWT. POST /api/auth/login returns a token for valid credentials. GET /api/auth/profile is protected.

Manage activity

Authenticated users create, list, retrieve, update, and delete their own workouts.

Find and get guidance

GET /api/workouts/search?q=... searches name/category and date-shaped terms. AI routes accept fitness values and return generated text.

Evidence

The ZIP contains FitTrack.postman_collection.json with requests; no execution screenshots or deployment URL were included.
