

AI FITTRACK API

Solution Requirements

Functional, quality, and interface requirements

TEAM ID	SWTID-2026-7021
TEAM	Baranivel K (Leader); Ramesh M; Srikanth M; Nandhakumar S; Chandru S
DATE	30 September 2026

Functional

- Register, log in, and return protected profile.
- Create/list/get/update/delete user-owned workouts.
- Search workout names/categories and date-shaped terms.
- Generate recommendation from age, fitnessGoal, experience.
- Generate insight from totalWorkouts, averageDuration, totalCaloriesBurned.

Data rules

Email is unique, normalized, and validated; password minimum is six characters. Workout categories are restricted; duration ≥ 1 ; calories ≥ 0 .

Quality

JSON REST API; JWT-protected private routes; Mongoose validation; environment-based secrets; centralized errors. AI depends on provider availability.

Interfaces

Routes are grouped under /api/auth, /api/workouts, and /api/ai. Postman base URL is http://localhost:5000.

Evidence

Source and collection are included; no execution report or service-level measurements were supplied.
