

AI FITTRACK API

Coding & Solution

Summary of implemented modules

TEAM ID	SWTID-2026-7021
TEAM	Baranivel K (Leader); Ramesh M; Srikanth M; Nandhakumar S; Chandru S
DATE	30 September 2026

Authentication

Registration checks fields and duplicate email; login checks bcrypt password; responses include JWT and safe user fields; profile returns current user.

Workout

Create/list/get/update/delete/search are implemented. Queries check owner; schema restricts categories and numeric values.

AI

Controllers validate request fields; geminiService builds prompts and calls Google Gen AI.

Application

Express configures CORS, JSON, Morgan, routes, root health response, not-found handling, and centralized errors.

Features

- Registration, login, profile, JWT.
- Workout CRUD and ownership checks.
- Name/category/date search.
- AI recommendation and insight.
- MongoDB persistence and validation.
- Central errors and health route.
- Postman variables/assertions.
