

AI FITTRACK API

Project Executable Files

Source package and setup reference

TEAM ID	SWTID-2026-7021
TEAM	Baranivel K (Leader); Ramesh M; Srikanth M; Nandhakumar S; Chandru S
DATE	30 September 2026

Included artifacts

ZIP contains src/, package.json, package-lock.json, README.md, .env.example, and FitTrack.postman_collection.json.

Setup

README recommends Node.js v20+. Run npm install; create local .env from .env.example; configure PORT, MONGO_URI, JWT_SECRET, GEMINI_API_KEY, and GEMINI_MODEL where used.

Run

Ensure MongoDB is reachable; npm run dev or npm start. Import Postman collection and set base_url.

Credentials

Do not share or commit real secrets. Original .env is excluded from this documentation ZIP.
